MEMORANDUM

I AD 073 469 288

SUBJECT: Final CEI Report, May 8, 2003, Industrial Laminates, Postville, Iowa

FROM Andy Mazzeo, Tetra Tech EMI *AM*

TO: John Bosky, EPA Region 7

Photographs 1 and 2 of the subject report actually were taken at the Bituma Corporation facility in Marquette, Iowa. The photographs show waste lamps and were taken during a RCRA Screening Inspection of the Bituma Corporation facility. Two photographs of waste lamps were also taken during the CEI of the Industrial Laminates facility. The two photographs of waste lamps for Bituma Corporation and the two photographs of waste lamps for Industrial Laminates inadvertently were switched before submittal of the subject report. Enclosed are the two photographs of waste lamps for the Industrial Laminates facility.

The mistake does not require substantive changes to the Notice of Preliminary Findings that were cited for the Industrial Laminates facility. At both the Industrial Laminates facility, and the Bituma Corporation facility waste lamps were not kept in closed containers. Additionally, both facilities violated the requirement to keep all waste lamps in containers properly labeled to identify their contents as universal waste lamps.
